

“CHATGPT STRIPED SHADOWS PROMPTS BY SAJAWAL CREATES”

Boy Main Prompt 1:

Use the face from the reference image exactly — match this person's real facial features, structure, and identity while generating the image with the style, lighting, and composition described below. A hyper-realistic luxury editorial fashion portrait of a striking young man in a close-up, shoulders-up composition, photographed from a subtle three-quarter side angle as he gently turns his head toward the camera. He has a naturally warm tan complexion with authentic skin texture, visible pores, realistic tonal variation, subtle natural imperfections, and light facial stubble defining a sharp jawline. His face features high, well-defined cheekbones, a masculine facial structure, naturally toned lips, expressive deep brown eyes with crisp catchlights, thick well-groomed dark eyebrows, and short-to-medium textured dark hair with soft natural waves and a few relaxed face-framing strands, styled effortlessly. He wears a fitted premium black crew-neck t-shirt with realistic fabric texture, complemented by minimal luxury accessories including a fine silver chain necklace and a discreet silver stud earring. Warm golden-hour sunlight streams through nearby window blinds, casting elegant linear patterns of light and shadow across his face, neck, and shoulders. The lighting is physically accurate and cinematic, producing rich honey-gold highlights, deep natural contrast, soft shadow transitions, and an intimate editorial atmosphere. The background falls into smooth, creamy bokeh with deep shadows and minimal visual distractions, emphasizing the subject while maintaining a premium luxury aesthetic. Captured on a professional full-frame camera with an 85mm f/1.4 prime lens at a wide aperture, featuring an extremely shallow depth of field, tack-sharp focus on the nearest eye, crystal-clear iris detail, realistic eyelashes, and luxurious background separation. Ultra-photorealistic skin with visible pores, micro skin texture, natural tonal transitions, and no skin smoothing. True-to-life color reproduction, cinematic HDR lighting, subtle organic film grain, premium magazine color grading, physically accurate global illumination, realistic light falloff, high dynamic range, soft contrast, extraordinary fine detail, luxury editorial photography aesthetic, Vogue-style fashion portrait, RAW photograph quality, no CGI, no illustration, no digital art, breathtaking 8K resolution.
