

“CHATGPT CITY STYLE PROMPTS BY SAJAWAL CREATES”

Prompt No. 1: (Main Prompt)

Hyper-realistic cinematic close-up street portrait photograph of a young woman (Use the face from the reference image exactly — match this person's real facial features, structure, and identity while generating the image with the style, lighting, and composition described below.) in her early twenties, extreme low-angle tilted composition (Dutch angle), captured mid-motion while walking through a busy urban shopping street at golden hour. She has long tousled wavy auburn-brown hair, wind-blown with loose strands catching backlight, natural skin texture with visible pores, subtle freckles, and a light golden sun-flush across her cheeks and nose. Soft glossy nude-pink lips slightly parted, natural minimal makeup, sharp defined eyebrows, intense direct eye contact with the camera lens, deep hazel-green eyes catching a warm catchlight. She wears an oversized black wool coat, collar slightly open. In the foreground, close to the camera, she holds a bright yellow paper shopping bag with visible brand lettering, Brand Name: SAJAWAL slightly out of sharp focus due to shallow depth of field.

Shot on a wide-angle lens (24mm-35mm equivalent) with visible mild barrel distortion, aperture f/1.8-f/2.0 for creamy background bokeh. Sharp focus locked precisely on her eyes and face, with everything else falling into soft blur. Background shows a warm-toned European stone building facade with classical columns and arched windows, slightly out of focus, alongside a vivid clear blue sky with wispy clouds. Below, a blurred crowd of pedestrians in motion, suggesting a busy street atmosphere with soft motion blur.

Lighting: strong golden-hour backlight from upper right, rim-lighting individual hair strands, warm directional sunlight creating natural highlights on the skin and soft falloff shadows on the far side of the face, slight lens flare bloom near the top edge of frame.

Color grading: warm amber-orange skin tones contrasted against a cool teal-blue sky, high dynamic range, filmic contrast curve, subtle natural film grain, no artificial smoothing.

Camera details: shot on full-frame mirrorless camera (Sony A7IV or Canon R5 equivalent), natural chromatic realism, true-to-life skin rendering, 8k ultra-high resolution, sharp micro-detail on hair strands, fabric texture, and skin — editorial fashion photography style, magazine cover quality, ultra-realistic, photorealistic, not CGI, not painted, not illustrated.

✗ Negative Prompt:

cgi, 3d render, cartoon, anime, illustration, painting, digital art look, plastic skin, waxy skin, over-smoothed skin, airbrushed, extra fingers, missing fingers, deformed hands, mutated hands, extra limbs, distorted face, asymmetrical eyes, cross-eyed, blurry face, out of focus face, low resolution, low detail, flat lighting, overexposed, underexposed, washed out colors, dull colors, unrealistic proportions, doll-like face, uncanny valley, bad anatomy, watermark, text overlay, signature, logo, frame border, duplicate person, extra heads, disfigured.”
