

“CHATGPT PETAL DREAMS PROMPTS BY SAJAWAL CREATES”

Prompt No. 1: (Main Prompt)

Ultra-realistic fine-art portrait photograph of a young woman (Use the exact same face as in the reference image — same eyes shape and color, same eyebrows, same nose structure, same lips, same jawline, same skin tone and texture, same facial proportions. Do not alter or generate a new face.) indistinguishable from an actual DSLR photograph. Short, softly tousled dark hair with a few loose strands catching the breeze. Hyper-realistic skin texture with visible pores and natural imperfections — no airbrushed or plastic look. Calm, distant, quietly melancholic expression with a soft closed-lip look, eyes slightly lowered as if lost in thought, gazing off-camera into the distance rather than directly at the lens. Standing at a gentle 3/4 angle, one hand lightly resting near the collarbone, shoulders relaxed and slightly turned away from camera, head tilted a few degrees downward. Wearing a muted teal midi dress with a small vintage floral print, lightweight cotton-linen fabric with soft natural folds and creases, subtle movement from the breeze, fine stitching visible at the collar and sleeves. Set in a lush, richly textured, overgrown garden in full bloom during golden-hour late afternoon — a real layered location, not a studio backdrop. Dense flowering rose bushes and climbing vines behind the subject with visible depth: sharper detail in the midground, soft atmospheric haze in the far background. A few out-of-focus blossoms in the foreground for added depth. White and pale peach flower petals drift through the air, some sharp and close, some soft and distant, frozen mid-motion by a fast shutter speed. Warm golden light filters through the leaves, creating dappled light patches and a subtle soft lens flare on one side, with natural light falloff into shadow at the edges of the frame. Waist-up framing, subject slightly off-center following the rule of thirds, with elegant negative space on one side. Shallow depth of field (f/1.8 equivalent), background softly blurred into creamy, rounded bokeh light circles rather than a smeared blur. Lighting is a directional soft key light from the upper left, gentle wraparound light on the face with subtle side-light adding dimension along the cheekbone and jaw, and a soft rim light along the hair edge separating the subject from the background. Natural shadow under the chin and jaw for dimension. Color palette of deep teal-greens, warm amber highlights on skin and petals, and cool teal-toned shadows (orange-teal cinematic grade). Painterly, filmic color grading with lifted shadows, soft highlight roll-off, increased micro-contrast, subtle film grain, and a gentle vignette drawing focus toward the subject's face. Shot on an 85mm f/1.8 portrait lens for natural compression and minimal distortion. Fine-art cinematic photography genre, high resolution with refined micro-detail and natural shot-on-film grain. Tack-sharp focus on the eyes and face, gradually softening toward the background. Ultra-detailed fabric weave and skin texture, visible fine hair strands, realistic light falloff on skin. Mood: dreamy, reflective, poetic, cinematic — gentle melancholy and quiet beauty, a sense of stillness within motion. Avoid: harsh lighting, modern fashion editorial look, oversaturated colors, flat/studio-look background, plastic or waxy

skin, over-smoothed/airbrushed skin, cartoon or anime style, extra fingers, distorted hands, unnatural symmetry, CGI look. 4:5 aspect ratio.

Pose 02:

Use the exact same face as in the reference image — same eyes shape and color, same eyebrows, same nose structure, gentle bittersweet smile, same jawline, same skin tone and texture, same facial proportions. Do not alter or generate a new face. Keep facial identity 100% consistent and unchanged across all angles and poses. Also Same background, lighting. Hand raised catching a falling petal mid-air, gaze following the hand upward, three-quarter angle, soft candid motion.

Pose 03:

Use the exact same face as in the reference image — same eyes shape and color, same eyebrows, same nose structure, same jawline, same skin tone and texture, same facial proportions. soft, barely-there smile — corners of the lips gently lifted. Do not alter or generate a new face. Keep facial identity 100% consistent and unchanged across all angles and poses. Also Same background, lighting. Walking away from camera through the garden, looking back over shoulder, dress caught mid-swirl, back three-quarter angle.

Pose 04:

Use the exact same face as in the reference image — same eyes shape and color, same eyebrows, same nose structure, soft shy smile, same jawline, same skin tone and texture, same facial proportions. Do not alter or generate a new face. Keep facial identity 100% consistent and unchanged across all angles and poses. Also Same background, lighting. Mid-twirl with dress flowing outward, head tilted back slightly, joyful yet soft expression, wide shot capturing full movement.

Pose 05:

Use the exact same face as in the reference image — same eyes shape and color, same eyebrows, same nose structure, lips softly closed, same jawline, same skin tone and texture, same facial proportions. Do not alter or generate a new face. Keep facial identity 100% consistent and unchanged across all angles and poses. Also Same background, lighting. Leaning back gently into the greenery, shoulders relaxed, head tilted to one side, soft distant gaze, front-angle medium shot.
