

“CHATGPT WILD ELEGANCE PROMPTS BY SAJAWAL CREATES”

FOR GIRLS:

PROMPT 01: RED PARROT

A reference image will be provided. Preserve the exact facial identity, facial structure, hairstyle, skin tone, facial proportions, expression, and overall likeness of the person from the reference image. Do not alter or reinterpret the face in any way. Keep the person's identity 100% consistent and recognizable. Only modify the outfit, pose, lighting, environment, and composition. A hyper-realistic, ultra-high-end luxury fashion editorial portrait featuring a beautiful young woman with a refined "clean girl" aesthetic, with a stunningly realistic red parrot perched gracefully on her shoulder. The composition feels like a premium Vogue, Harper's Bazaar, or luxury fashion campaign, blending couture fashion with believable photographic realism. Every element is physically accurate, cinematic, and photographically authentic.

The woman has flawless natural skin with visible pores, subtle peach fuzz, realistic skin texture, soft matte finish, minimal clean-glam makeup, naturally defined eyebrows, soft nude lips, and delicate eyelashes. Her dark hair is styled into a perfectly sleek high bun with a few loose strands framing her face naturally. She maintains a calm, confident luxury editorial expression while looking slightly off-camera, her head tilted gently toward the parrot on her shoulder.

She wears an exquisite deep red silk Versace-inspired luxury button-down shirt, buttoned modestly up to the collarbone with only the top button left slightly open, featuring intricate metallic gold baroque embroidery, ornate acanthus leaves, Greek key borders, ornamental medallions, luxurious detailing, rich satin reflections, elegant tailoring, and realistic fabric folds. The neckline is elegant and fully professional — high modest collar, no cleavage or chest exposure, appropriate for a formal luxury fashion editorial. The shirt fits naturally without gaping at the chest, with proper structured tailoring.

Also add this to the Negative Prompt section:

low neckline, open collar, cleavage, exposed chest, revealing clothing, unbuttoned shirt, sexualized pose, inappropriate exposure.

The parrot sits naturally on her shoulder, one foot gripping the fabric with realistic weight and grip, tail feathers trailing elegantly down her back. Her shoulder fabric shows subtle natural compression and slight wrinkling where the bird's feet rest.

The parrot itself is an extremely realistic macaw-type bird — predominantly rich scarlet-red plumage covering the head, chest, and back, with vivid green accent feathers along the wings, and small patches of deep blue at the wingtips. Individual feather barbs are visible, with soft downy underlayers near the neck. Glossy, alert dark eyes with realistic moisture and a fine ring of bare skin around the eye. Strong curved black-grey beak with realistic texture and subtle sheen. Scaled, realistic feet with natural grip texture and small claws. Naturally weighted, lifelike posture with wings held close to the body.
