

“CHATGPT SKY HIGH PROMPTS BY SAJAWAL CREATES”

FOR GIRLS:

PROMPT NO: 01

Reference photo attached — use the exact same face, identical facial features, skin tone, hairstyle, body proportions, and complete identity preserved exactly as shown, no alterations to face or structure whatsoever. Ultra-realistic cinematic editorial photograph, ultra-wide low-angle ground-level perspective, captured as if the camera is positioned directly beneath the woman's foot during a natural walking step, creating a physically accurate forced-perspective illusion rather than digital distortion.

A stylish young woman confidently walks through a vibrant meadow filled with blooming cosmos and wildflowers. Her shoe sole dominates the extreme foreground with exceptional realism: sharply defined tread pattern, subtle wear marks, fine dust, tiny grass particles trapped inside the grooves, realistic rubber texture, stitching, and naturally accurate perspective scaling as the shoe recedes toward her leg.

She wears an elegant soft beige luxury outfit consisting of tailored trousers, a light fitted jacket, and minimal accessories. The fabric displays authentic weave, natural folds, wrinkles, and realistic movement generated by her stride. Her long flowing hair moves naturally in the breeze with individually visible strands illuminated by warm sunlight.

The flower field is dense with pink, white, lavender, and soft purple cosmos and wildflowers. Foreground flowers close to the lens are gently blurred by depth of field while flowers surrounding the subject remain crisp before gradually fading into smooth natural bokeh. Loose flower petals drift realistically through the air.

Above, a bright blue sky with soft cumulus clouds creates an airy atmosphere. Gentle sun rays filter through the clouds, producing subtle volumetric lighting without appearing artificial.

Natural directional sunlight creates physically correct highlights and soft shadows across the woman, shoe, flowers, and ground. Accurate ambient light, realistic global illumination, believable color bounce, and consistent shadow direction.

Ultra-realistic skin with visible pores, fine facial detail, subtle tonal variation, natural lips, realistic eyes, no beauty filter, no skin smoothing, no plastic appearance.

Professional high-fashion editorial photography, shallow depth of field, tack-sharp focus on the shoe sole and the woman, realistic optical lens characteristics, authentic wide-angle lens rendering, cinematic composition, perfect perspective consistency, true-to-life colors, RAW photography, HDR, 8K, hyper-photorealistic, looks like a real camera photograph, absolutely no CGI appearance.
