Deep Purple — Curious Head Tilt

Reference image attached — sole identity reference for the man. Preserve his exact facial identity, facial structure, facial proportions, skin tone, hairstyle, hairline, body proportions, and overall recognizable likeness exactly as shown. Zero face drift, zero identity change, no beautification, no facial reinterpretation. Keep realistic pores, natural skin texture, authentic facial details, and completely natural skin — no beauty filter or plastic smoothing.

Create an ultra-photorealistic vertical 4:5 luxury fashion editorial photograph of the man standing beside an original deep-purple plush bird mascot character inside a premium monochromatic studio.

Bird Character

A completely original mascot design — not based on or resembling any existing copyrighted character.

The bird has a tall, vertically elongated, slender plush silhouette with a soft rounded torso and slightly oversized head. Its facial design is highly expressive and adorable:

- Large expressive round eyes with a lively, gentle gaze
- Soft rounded black eyebrows naturally raised into a gentle curious arch
- Short, rounded, slightly curved orange beak
- Head tilted noticeably sideways, creating an unmistakable curious head-tilt pose
- One eye slightly squinted in playful curiosity
- Beak forming a soft, subtle closed-mouth smile
- Tall black feather crest with several soft rounded spikes
- Short, stubby plush wings
- One wing tucked shyly behind its back
- Small stubby legs
- Small rounded black tail feathers

The entire bird is covered in dense deep-purple plush fur, with individually visible fibers, realistic softness, subtle compression where the plush is touched, natural fabric/fur shading, and physically accurate material response.

Expression: shy, endearing, curious, innocent, playful, warm, adorable mascot energy — never aggressive or intimidating.

Man's Pose & Expression

The man is crouching gently beside the bird at approximately its eye level, creating a warm interaction between both subjects.

Both of his hands are positioned naturally and gently near the bird's face, as if affectionately cupping or framing its cheeks without squeezing or deforming the plush.

He wears a warm, affectionate, genuine smile, with a relaxed natural expression and soft eyes. His body language should feel candid, caring, comfortable, and emotionally connected to the mascot.

Maintain completely natural anatomy, realistic hand positioning, believable finger structure, and relaxed posture.

Outfit

The man wears a premium **deep-purple cotton-silk shirt**, fully buttoned, with a relaxed collar and sophisticated modest fit.

Pair it with:

- Slim-fit dark-grey trousers
- Crisp professionally pressed trouser creases
- Premium white leather sneakers with subtle purple accents
- Minimal silver wristwatch
- Clean, understated luxury styling

The clothing should display realistic cotton-silk weave, natural folds, stitching, fabric tension, subtle specular highlights, and physically accurate draping.

Studio Environment

A premium **fully monochromatic seamless deep-purple studio**.

The backdrop and floor share the same deep-purple tonal family, creating an elegant continuous environment with:

- Smooth tonal gradient
- Seamless cyclorama appearance
- Subtle atmospheric vignette
- Soft realistic contact shadows beneath both subjects
- Gentle grounding shadows around the bird's feet and man's shoes
- No visible studio equipment
- No distracting background elements

The environment should feel like a high-end luxury fashion campaign set.

Lighting

Use a **bright, soft editorial beauty-light setup** coming primarily from the front and slightly above.

Create:

- Natural facial dimensionality
- Soft flattering illumination
- Controlled highlights across the shirt
- Realistic highlights and shadow transitions across the plush fur
- Subtle rim/edge separation around both subjects
- Soft physically accurate falloff
- Natural shadow density
- No harsh artificial spotlighting
- No overexposure

The man's face must remain naturally detailed and recognizable under the lighting.

Camera & Composition

Strict vertical 4:5 aspect ratio.

Full-body editorial composition with both the man and bird completely visible inside the frame.

Camera positioned approximately at **eye level**, using a **45mm lens look at f/2.2** for natural perspective and moderate shallow depth of field.

Composition should feel balanced, premium, and intentionally photographed rather than artificially posed.

Both subjects must remain sharp enough to clearly read their expressions, while the background falls away naturally.

Primary visual focus: the man's authentic face and the bird's expressive curious face.

Natural perspective, realistic proportions, no wide-angle distortion, no excessive bokeh, and no cropped limbs or heads.

Photorealism & Quality

Ultra-photorealistic luxury editorial photography with:

- RAW photographic aesthetic
- 8K-level micro-detail
- Realistic skin pores

- Natural facial texture
- Individual plush-fur fibers
