

“CHATGPT PLAYFUL CLOUD PROMPTS BY SAJAWAL CREATES”

FOR GIRLS:

PROMPT NO: 01

Theme: Cloud Umbrella

Subject: Full-body shot of a young woman under a vivid blue sky, holding up an actual cloud — not a fabric umbrella — as if it were a parasol shielding her from the sun. She stands centered-right in the lower half of the frame, body angled to the side, with the massive sky and cloud dominating the composition above her.

Face reference note: Use the attached reference image for the face. Generate the subject's face to exactly match the reference image — same facial features, structure, and likeness — with the face turned toward the camera so the identity is clearly recognizable, even though the body stays side-angled.

Camera angle: Medium-full body shot, camera positioned at chest-to-eye height with enough distance from the subject to avoid wide-angle perspective distortion (do not shoot too close-up with a low, tilted-up angle, as this exaggerates the head/face size relative to the body). Keep the lens at a natural mid-telephoto distance so the head-to-body ratio stays true to normal human proportions (roughly 1:7 to 1:8 head-to-height ratio). Subject's body stays in side profile (angled toward the cloud/umbrella direction), but the head and face are turned/tilted toward the camera, so the face is fully visible and clearly recognizable while the body posture remains side-on. The raised arm and cloud umbrella remain fully in frame above her.

Face & expression: Dark brown, straight, shoulder-length hair, side-parted, strands drifting gently in the wind but not covering the face. Head tilted toward the camera with eyes looking directly at the lens, lips gently closed in a calm, natural expression. Face clearly lit and sharply detailed, matching the reference image exactly. Critical: the head size must follow realistic human anatomy proportions relative to the full body (head height approximately 1/7th to 1/8th of total body height) — the same ratio visible in the reference image. Do not enlarge, magnify, or zoom the face independently of the body. Neck, jawline, and shoulders must blend seamlessly and anatomically with the body, with consistent skin tone, lighting direction, scale, and shadow

falloff between face and body so the head reads as a natural, correctly-sized, integrated part of the same person and the same shot — not composited, stretched, or pasted on at a mismatched scale.

Outfit & pose (fully covered): Modest, fully-covering outfit — long-sleeve light blouse/top in pale sky-blue, paired with a full-length flared skirt or loose trousers in a matching soft tone (no midriff, arms, or legs exposed). Closed flat sandals or covered shoes. A thin, natural woven crossbody bag on one shoulder. Standing at the edge of a grassy embankment, facing forward. Right arm extended overhead holding a slender black umbrella shaft with a white curved handle, connecting directly into the base of the cloud above. Left arm relaxed at her side.

Background & lighting: Vast, richly saturated deep blue sky filling most of the frame. Overhead, one large horizontal cloud with cotton-like volume and texture — the "umbrella" — gently gilded at its lower edge by sunlight. Fine golden sunlit raindrops fall only from beneath this cloud, sparkling mid-air, with a few visible droplets landing on her shoulder and the ground — her own private "sunshine rain" while the rest of the sky stays clear. Behind and below the umbrella cloud, arrange smaller white cumulus clouds thoughtfully across the frame for visual balance — a cluster drifting along the lower-left horizon, a smaller wisp on the upper-right corner, and light scattered puffs receding toward the mountains for depth — rather than clustering all clouds on one side. The cloud placement should lead the eye naturally toward the subject and the umbrella cloud above her, not compete with it. Hazy blue-green mountain ridges line the horizon, soft blurred tall grass in the foreground. Soft-to-medium frontal-side sunlight keeps the face evenly lit and free of harsh shadow, while directional light from upper right still models the cloud and background.

Composition & camera: Vertical 3:4 ratio. Camera at chest-height, angled slightly up to include the cloud umbrella while keeping the tilted face clearly visible. Subject slightly right of center, body in side profile, cloud upper-center, generous sky negative space around her. Diagonal embankment line crosses the lower edge. Sharp focus on face, subject, and cloud; foreground grass softly blurred.

Texture & style: High-detail photorealistic photography, ultra-sharp HD/4K quality overall. Face must be clearly visible, crisp, and in sharp focus with no blur, haze, or softness — every facial detail rendered with high clarity, matching the reference image precisely. Fresh, transparent summer color palette — clean blues and whites. Realistic wind movement in hair and fabric (kept off the face), tactile puffy cloud volume, photoreal sunlit droplets. True-to-reference, clearly recognizable face.

Negative prompt: do not turn the cloud umbrella into an ordinary fabric umbrella; do not alter or generalize the face away from the reference image; do not turn the body fully front-facing (body must stay side-angled); no hair strands covering the face; no exposed midriff, arms, or legs; avoid harsh shadows across the face; avoid cartoonish or CGI-looking rain droplets; no blurry, soft, low-resolution, or low-detail face; no grainy or low-quality overall image; no oversized, enlarged, giant, or disproportionate head relative to the body; no face/head bigger than natural human head-to-body ratio; no face that looks pasted-on, composited, zoomed-in, or

disconnected from the neck/body; no mismatched skin tone, lighting, or scale between face and body; no close-up or wide-angle distortion of the face; no clouds bunched only on one side of the frame; avoid cluttered or unbalanced cloud placement in the background.

PROMPT NO: 02

Cloud Bouquet

CRITICAL FACE LOCK: The attached reference image is the exact face to use for this subject — do not generate a new or generic face. Match facial structure, eyes, nose, lips, jawline, skin tone, and overall likeness precisely to the reference. The final image's face must be immediately recognizable as the same person from the reference photo, not just "similar" or "inspired by." Any deviation from the reference face is unacceptable.

Theme: Playful Cloud — Holding a Bouquet of Clouds

Subject: Full-body shot of a young woman holding a bunch of small, fluffy cloud-puffs gathered together like a bouquet of balloons, tied loosely with a thin ribbon, gently pulling upward as if they have slight lift. She stands centered-right, body angled to the side, face turned to camera, one arm raised holding the cloud-bouquet's ribbon, the other arm relaxed, skirt/hair caught in a light breeze suggesting the clouds are gently tugging her.

Face reference note: Use the attached reference image for the face — exact match to structure and likeness, face turned toward camera, fully recognizable.

Camera angle: Same as series — medium-full shot, chest-to-eye height, mid-telephoto distance, natural head-to-body ratio (1:7–1:8), body side-angled, face toward camera.

Face & expression: Same reference hair, softly wind-blown but off the face. Delighted, slightly surprised-happy expression — as if the clouds just lifted a little in her hand. Eyes to camera, warm natural expression.

Outfit & pose (fully covered): Light long-sleeve top in soft sky-blue or lilac, full-length flowy skirt in a matching pastel, closed flat shoes, same crossbody bag for series continuity.

Background & lighting: Bright, clean midday sky in vivid blue with a few balanced cumulus clouds (lower-left and upper-right, for symmetry — never bunched one side). Soft directional sunlight keeps the face evenly lit. A subtle trail of tiny cloud wisps drifts from the bouquet upward, like the clouds are gently escaping — adds a whimsical, shareable "aww" moment. Tall soft-blurred grass in foreground, hazy mountains on horizon.

Composition & camera: Vertical 3:4, subject slightly right of center, cloud-bouquet in upper-center frame, generous sky negative space. Sharp focus on face, subject, and bouquet; foreground softly blurred.

Texture & style: Photorealistic, ultra-sharp HD/4K, fresh clean pastel-blue palette, tactile puffy cloud texture, warm inviting mood built for high shareability (soft "wow" factor).

Negative prompt: no fabric balloons, no altered/generalized face, no fully front body, no hair on face, no exposed skin beyond face/hands, no oversized head, no composited/pasted face, no harsh shadows, no one-sided cloud clustering, no cartoonish or low-detail rendering.

PROMPT NO: 03

Cloud Swing

CRITICAL FACE LOCK: The attached reference image is the exact face to use for this subject — do not generate a new or generic face. Match facial structure, eyes, nose, lips, jawline, skin tone, and overall likeness precisely to the reference. The final image's face must be immediately recognizable as the same person from the reference photo, not just "similar" or "inspired by." Any deviation from the reference face is unacceptable.

Subject: Full-body shot of a young woman sitting on a swing made entirely of soft white cloud, its two "ropes" formed from thin wisps of cloud trailing up into a larger cloud mass above, as if she's swinging mid-air in the sky. She's captured mid-swing motion, legs gently kicked forward, one hand loosely gripping a cloud-rope, the other arm relaxed and slightly trailing back for movement. She sits centered-right in the lower half of frame, body angled to the side following the swing's motion, with the vast sky and swing structure dominating above her.

Face reference note: Use the attached reference image for the face. Generate the subject's face to exactly match the reference image — same facial features, structure, and likeness — with the face turned toward the camera so identity is clearly recognizable, even though the body stays angled with the swing's motion.

Camera angle: Medium-full body shot, camera positioned at chest-to-eye height, natural mid-telephoto distance, no wide-angle distortion. Head-to-body ratio stays true to normal human proportions (1:7 to 1:8). Body follows the diagonal motion of the swing (side-angled), head and face turned toward camera, fully visible and recognizable.

Face & expression: Same hair as reference (dark brown, straight, shoulder-length, side-parted), strands lifting gently with the swing's motion. Genuine joyful expression — soft laugh or bright smile, eyes toward the lens, sense of playful movement in her expression, not static.

Outfit & pose (fully covered): Long-sleeve pastel blouse in soft peach or blush, paired with a flared midi or full-length skirt in a complementary pastel tone (fabric visibly flowing with the

swing motion for dynamism). Closed flat shoes. Same woven crossbody bag for series continuity.

Background & lighting: Vibrant clear blue sky, matching the rest of the series — no golden/amber/sunset tones anywhere in the frame. Smaller wispy white clouds scattered for balance (lower-left cluster, upper-right wisp). A few loose feather-light cloud particles drift near her, catching soft natural daylight — bright and airy, not warm-toned. Hazy mountain silhouette on the horizon for depth. Fabric and hair caught mid-motion for energy.

Composition & camera: Vertical 3:4. Subject slightly right of center, swing structure filling the upper-center. Sharp focus on face and subject; background clean and evenly lit.

Texture & style: Photorealistic, ultra-sharp HD/4K, fresh clean color grade (blue + white + pastel outfit) — same palette as the rest of the series, not warm/golden. Tactile cloud texture, genuine sense of joyful motion.

Negative prompt: no static/stiff pose, no fully front-facing body, no face obscured by hair, no exposed midriff/arms/legs, no oversized head, no pasted-on/composited face, no harsh flat lighting, no clouds clustered on one side, no cartoonish rendering, no golden-hour, sunset, amber, or orange tones in sky or lighting — sky must stay clean blue like the rest of the series.

FOR BOYS:

PROMPT NO: 01

Cloud Kite

CRITICAL FACE LOCK: The attached reference image is the exact face to use for this subject — do not generate a new or generic face. Match facial structure, eyes, nose, lips, jawline, skin tone, and overall likeness precisely to the reference. The final image's face must be immediately recognizable as the same person from the reference photo, not just "similar" or "inspired by." Any deviation from the reference face is unacceptable.

Subject: Full-body shot of a young man standing on a grassy hilltop, flying a small fluffy cloud like a kite — a thin string runs from his raised hand up into a compact cloud shape drifting above, as if the cloud itself is tugging gently at the string. He's captured mid-stride, one foot forward as if walking/running lightly to keep the "kite" aloft, body angled to the side, string-holding arm raised and slightly behind him, other arm swinging naturally for momentum. He stands centered-right in the lower half of the frame, with the sky and cloud-kite dominating above.

Face reference note: Use the attached reference image for the face. Generate the subject's face to exactly match the reference image — same facial features, structure, and likeness — with the

face turned toward the camera so identity is clearly recognizable, even though the body stays side-angled in mid-stride motion.

Camera angle: Medium-full body shot, camera positioned at chest-to-eye height, natural mid-telephoto distance, no wide-angle distortion. Head-to-body ratio stays true to normal human proportions (1:7 to 1:8). Body in dynamic side-angle motion, head and face turned toward camera, fully visible and recognizable.

Face & expression: Short, natural dark hair matching reference, slightly tousled by wind/motion. Genuine energetic expression — light grin or focused excitement, eyes toward the lens, sense of playful momentum, not static.

Outfit & pose (fully covered): Casual long-sleeve henley or button-up in muted sky-blue or stone grey, rolled sleeves optional but kept modest, straight-fit trousers or chinos, closed casual shoes (sneakers or boots). Fabric caught mid-motion for energy.

Background & lighting: Bright, clear late-afternoon sky, soft warm light from one side. The cloud-kite sits mid-upper frame, thin string visible connecting to his hand. Smaller wispy clouds balanced across the sky (lower-left cluster, upper-right wisp) — never bunched one side. Hazy green hills rolling into the distance, soft-blurred tall grass in foreground for depth.

Composition & camera: Vertical 3:4. Subject slightly right of center, cloud-kite and string in upper-center frame, generous sky negative space. Sharp focus on face, subject, and string/cloud; foreground softly blurred.

Texture & style: Photorealistic, ultra-sharp HD/4K, clean fresh color palette (sky-blue, warm gold accents), tactile puffy cloud texture, genuine sense of joyful motion — designed to feel fun and shareable.

Negative prompt: no static/stiff pose, no fully front-facing body, no oversized head, no pasted-on/composited face, no altered/generalized face, no harsh flat lighting, no clouds clustered on one side, no cartoonish or low-detail rendering, no exposed torso/shorts.

PROMPT NO: 02

Cloud Bench

CRITICAL FACE LOCK: The attached reference image is the exact face to use for this subject — do not generate a new or generic face. Match facial structure, eyes, nose, lips, jawline, skin tone, and overall likeness precisely to the reference. The final image's face must be immediately recognizable as the same person from the reference photo, not just "similar" or "inspired by." Any deviation from the reference face is unacceptable.

Subject: Full-body shot of a young man casually leaning back against a solid-looking bench made entirely of dense white cloud, floating just above a grassy hillside, as if he's taking a relaxed break mid-air. One arm rests along the top of the cloud-bench, ankles casually crossed, body angled to the side in a relaxed lean, weight settled comfortably into the cloud as though it were solid furniture. He is positioned centered-right in the lower-mid frame, with the cloud-bench and open sky filling the space above and around him.

Face reference note: Use the attached reference image for the face — exact match to structure and likeness, face turned toward camera, fully recognizable, relaxed natural expression.

Camera angle: Medium-full body shot, camera at chest-to-eye height, natural mid-telephoto distance, no wide-angle distortion. Head-to-body ratio stays true to normal human proportions (1:7–1:8). Body reclined/angled to the side against the cloud-bench, head and face turned toward camera.

Face & expression: Short natural hair matching reference. Calm, confident half-smile, eyes toward the lens, relaxed and approachable mood — a "caught in an easy moment" feel rather than a posed stare.

Outfit & pose (fully covered): Fitted long-sleeve crew or light jacket in soft neutral tone (stone, sage, or muted blue), straight trousers, clean casual shoes. Modest, fully covered, no exposed arms/legs.

Background & lighting: Soft late-morning sky in gentle blue with a warm undertone, sunlight coming from one side to model the cloud-bench's volume and cast a soft natural shadow beneath him. Smaller balanced clouds scattered across the sky (lower-left and upper-right) for visual harmony. Rolling green hills and light haze on the horizon for depth, soft-blurred grass in the foreground.

Composition & camera: Vertical 3:4. Subject slightly right of center, cloud-bench filling the mid-frame around him, generous sky negative space above. Sharp focus on face and subject; background and foreground grass softly blurred.

Texture & style: Photorealistic, ultra-sharp HD/4K, soft warm-neutral color grade, tactile dense-cloud texture that reads as sittable/solid, calm and inviting mood built for high shareability.

Negative prompt: no fully front-facing body, no stiff/formal posture, no oversized head, no pasted-on/composited face, no altered/generalized face, no harsh shadows, no clouds clustered on one side, no cartoonish or low-detail rendering, no exposed torso/shorts.
